INFINITY 3-6UR
Research-Grade 6.0 Megapixel CCD USB 3.0 Camera

INFINITY 3-6UR
INFINITY 3-6UR is a high-speed, high sensitivity research-grade camera with a six megapixel resolution. The INFINITY 3-6UR incorporates Sony’s remarkable ICX694 CCD sensor, that provides high dynamic range and speed. Full resolution 6.0 MP images are sent to a host computer at up to 27 frames per second (fps). The research-grade designation of the INFINITY 3-6UR is a testament to the low noise electronics, high-grade components and unique thermal management techniques used in the camera. The result is an industry-leading, high-performance, low noise digital camera, alone in its class. This microscopy camera is designed for use in a wide variety of scientific, life science, clinical and industrial applications requiring optimal color reproduction, extreme sensitivity, increased resolution and high speed.

Superior Sensitivity and Color Reproduction
The INFINITY 3-6UR has the unmatched sensitivity needed for low light applications. Relying on Sony’s EXview HAD II technology, this camera offers extremely high dynamic range, 4.54 x 4.54 µm pixels and very low noise. With 2x2 binning, there is a fourfold increase in sensitivity while providing a 1.5 MP (1376x1096) resolution. The INFINITY 3-6UR delivers outstanding image quality and value for challenging low light applications such as fluorescence and NIR imaging.

USB 3.0 High-Speed Plug-and-Play Interface
The INFINITY 3-6UR uses the latest USB 3.0 technology at 5 Gbits/sec to deliver the fastest image transfer - even at its highest resolution. Image captures can be synchronized using either a hardware or software trigger. 128 MB of onboard memory for frame buffering ensures dependable and reliable image delivery at full frame rate and highest resolution even in the most demanding systems. USB 3.0 is the ideal choice for microscopy as it is readily available on today’s computers, while plug-and-play connectivity makes for easy installation.

Full Image Analysis Software Included
INFINITY CAPTURE, an intuitive image capture program, and INFINITY ANALYZE, a full image analysis package offering camera control, multi-spectral capture and composition, measurement, annotation, tiling and post capture enhancement, are included with the camera. Camera and software combine to create a complete microscopy imaging solution for your application.

Superior Technical Assistance Center (TAC)
All cameras are supported by an experienced team of technical support and imaging experts widely acclaimed in the industry. As a customer you gain access to the TAC group and knowledge base, providing full support for cameras, software and microscopy applications.
